## POLYTOP 5050 POLYUREA

*HIGH-GLOSS POLYUREA COATING DESIGNED FOR CONCRETE COUNTERTOPS*

PolyTop 5050 Polyurea Concrete Countertop Sealer is a proprietary formula that is designed for residential and commercial countertops. New developments in nanotechnology have allowed us to increase the heat resistance of this already heat-resistant concrete counter sealer. PolyTop 5050 has a pot life of up to 45 minutes in real-world conditions and is fast drying in 60-90 minutes after it is applied to concrete. PolyTop 5050 will provide an extremely

wet look to the concrete due to its ability to dive deep into the concrete surface. This easy-to-apply, highly durable concrete counter sealer is perfect for any concrete countertop, whether you're applying it as a direct-to-concrete sealer or as a topcoat for decorative epoxy coatings. Thanks to its high UV-resistance ratings, PolyTop 5050 Polyurea Concrete Countertop Sealer can be used both indoors and outdoors with equally spectacular results.

### FEATURES & ADVANTAGES

- Nanotechnology Resists Heat
- Non-Yellowing for Use Inside or Outside
- Extremely Fast Drying
- Long Pot Life
- Penetrates Deep Into Porous Concrete
- Provides an Extremely "Wet Look"
- Abrasion Resistant
- Will Cure At Temperatures Just Above Freezing
