Wash hands thoroughly after handling.

## **SECTION 8. EXPOSURE CONTROLS / PERSONAL PROTECTION**

### **Control Parameters**

Propylene Glycol Monomethyl Acetate (CAS #108-65-6)  
Threshold Limit Value: TWA 50.000 ppm  
USA Workplace Environmental Levels (WEEL)

### **Engineer Controls**

Use process enclosures, local exhaust ventilation, or other engineering controls to keep worker exposure to airborne contaminants below recommended exposure limits.  
Wear appropriate personal protective equipment where such systems are not effective to perform satisfactorily and meets OSHA or other recognized standards.  
Handle in accordance with good industrial hygiene and safety practice.  
Wash hands before breaks and at the end of workday.

### **Personal Protection Equipment - Eye/Face Protection**

Tightly fitted safety goggles.  
Face shield (8-inch minimum).  
Use equipment for eye protection tested and approved under appropriate government standards such as NIOSH (US) or EN 166(EU).

### Skin Protection

Handle with gloves. Gloves must be inspected prior to use.  
 Use proper glove removal technique (without touching glove's outer surface) to avoid skin contact with this product.  
 Dispose of contaminated gloves after use in accordance with applicable laws and good laboratory practices.  
 Wash and dry hands after handling or before eating, drinking, or smoking.

### Body Protection

If used in solution, or mixed with other substances, and under conditions which differ from EN 374, contact the supplier of the CE approved gloves.  
 This recommendation is advisory only and must be evaluated by an industrial hygienist and safety officer familiar with the specific situation of anticipated use by our customers.  
 It should not be construed as offering an approval for any specific use scenario.  
 Impervious clothing.  
 Closed-toe shoe.

### Respiratory Protection

Flame retardant antistatic protective clothing.  
 The type of protective equipment must be selected according to the concentration and amount of the dangerous substance at the specific workplace.  
 Where risk assessment shows air-purifying respirators are appropriate use a full-face respirator with multipurpose combination (US) or type ABEK (EN 14387) respirator cartridges as a backup to engineering controls.  
 If the respirator is the sole means of protection, use a full-face supplied air respirator. Use respirators and components tested and approved under appropriate government standards such as NIOSH (US) or CEN (EU).

### Environmental Exposure Controls

Prevent further leakage or spillage if safe to do so.  
 Do not allow product enter into sewers or waterways.
