

# Versa-Crete

## Decorative Concrete Microtopping

The Versa-Crete Decorative Micro-Topping System will transform your old stained and cracked concrete into "Like New" condition while also providing a wide range of beautiful finishes. Versa-Crete uses revolutionary technology to create a permanent bond to your existing concrete while also creating a thin decorative coating that is harder and more resilient than most concrete. Just select your favorite finish and have it installed to your existing concrete floor without the need for doing expensive removal of your existing concrete.

The many different patterns and textures offered by the Versa-Crete System are designed to provide you with the luxurious look of stone, marble, slate, tile or it can even be applied in a uniform Knockdown or Broom Finish.

Versa-Crete is available in more than 18 standard integral colors and stains, making it ideal to use in any area.

And best of all, you don't have to worry about the Versa-Crete bubbling or popping off when the LIFETIME PRIMER and Adhesion Aggregate are used. That's because the LIFETIME PRIMER utilizes proprietary "Wicking Technology" that penetrates deep into the existing concrete surface to provide a tenacious bond able to withstand at least 8 Lbs of Moisture Vapor Emissions.

# DECORATIVE CONCRETE

## Advantages:

- Lifetime Adhesion Warranty available.
- Creates hard abrasion resistant surface.
- Excellent moisture and freeze thaw resistance.
- Economical.
- Easy to install.
- Decorative.
- Low maintenance.
- Durable.

**Economical Knockdown Texture:** The Knockdown pattern is a very economical way to really improve the appearance of your old concrete surface. The Knockdown texture is designed to create a uniform flat textured surface that is pleasant to look at while remaining cooler than standard concrete. Bare feet are only in contact with about 60% of the surface when walking on it which makes it feel cooler.

**Stenciled Patterns:** Versa-Crete is designed to let you be as creative as you want, have your installer use our grout tape to design any pattern you desire or use pre fabricated stencils that come in patterns ranging from Brick to Ashlar Slate. The Versa-Crete Stenciled Concrete Overlay System will transform your worn, aged concrete floor into a beautiful simulated pattern of your choosing. You can also select from several different texture techniques ranging from chatter trowel, orange peel texture, skip trowel or knockdown texture to create the desired stone or tile effect. Your installer can also combine the finished look with our Reactive Versa-Stain to give it an ultimate custom finish.

**Smooth Finish:** The Versa-Crete Smooth Finish is designed to provide a thin decorative smooth concrete finish over your existing concrete floor. Your installer can transform the look of a worn, aged concrete floor into the luxurious look of a smooth hard trowel finish or one that replicates the same look as a polished concrete floor.

**Weathered Finish:** The Versa-Crete Weathered Finish transforms the look of your worn concrete floor into the luxurious look of a smooth weathered concrete floor. Your installer achieves the weathered look by layering the Versa-Crete using the colors you choose and they can even create more color movement and old world charm by using the Reactive Versa-Stain over it before applying the final protective sealer.
